I am a result-oriented front-end developer with a year's experience in IT. I am looking for a remote job as a front end developer of React or React Native, there is a possibility of moving to a full-time job after a while. As for the character, I'm more of an extrovert. The underlying is not all I have done.
In the knowledge column the most basic is written , many other libraries are omitted.

Frontend

Stack: JS, TS, React, Effector, Redux, Mobx.
I realized that I didn't know much and started studying: different patterns (for example: Feature-sliced design, Atomic design, SOLID), Clean Code (Robert Martin), Clean Architecture (Robert Martin), JS complete guide 7th edition (David Flanagan).
Projects:
vk - github - I am the organizer, the team leader of the whole team, the technical leader at the fronts, the architect of the front, and also make final decisions on the entire project.
restaurant - react, ts, effector, telegram web api.
Todo list - github - react, ts, effector.
Autorization and posts - github - react native, ts, effector, expo, android studio.
